

# Hayabusa2 Ryugu Sample Display Exhibition

Hayabusa2 successfully returned a capsule containing samples collected on asteroid Ryugu to Earth in December 2020. These asteroid grains are mostly studied by scientists in Japan and around the world. They expect to understand origins of life on Earth by studying these grains. A sample grain from the asteroid will be on public display during the Tokyo Tech Festival – Koudaisai.

Exhibition date / hours: 28, 29 October, 2023 / 10:00 ~ 16:30 (Kodaisai)

Registration: Advance reservation required (Admission Free)

←Reservation for 10/28

←Reservation for 10/29

Venue: Tokyo Tech Museum (Centennial Hall) 2nd floor, Special Exhibition Room

Organiser: Earth-Life Science Institute (ELSI) and Tokyo Tech Museum

Cooperation: ISAS, JAXA
